

## WRAP-AROUND SHOOTING

---

**PURPOSE:** To improve scoring skills from behind the net or below the goal line.

**SET-UP:** Players form two lines, one in each corner with the start of the line on the goal line. P1 passes a puck off the boards behind the net to P2 who picks up the puck below the goal line and takes it to the net to score. He can either take the puck behind the net and use a wrap-around or walk out in front tight to the net to score.

Goalies are forced to move post-to-post with the pass and then play the shooter from behind the net. This is also an excellent drill for goalies' movement and balance.
